EXPERIENCE

Application Architecture Intern

CI Financial

May 2025 – August 2025, Toronto, ON

- Migrated legacy data pipelines from *CGI's Sybase/SQR stack* to *Snowflake*, converting and modernizing complex SQR logic into Python and SQL based workflows supporting advisor-facing financial applications.
- Validated and reconciled migrated data across multiple transformation stages, verifying record counts and schema consistency to maintain complete data accuracy and referential integrity.
- Automated Jira ticket creation and tracking through custom Bash and Python scripts, streamlining sprint workflows and issue management within Agile processes.
- Debugged and optimized Python ETL modules, resolving logic and data processing errors to ensure reliable daily ingestion and transformation of Snowflake datasets.

Full-Stack Developer Intern

CI Financial

May 2024 – August 2024, Toronto, ON

- Built a responsive financial advisory platform using Next.js and Tailwind CSS.
- Integrated real-time data pipelines from financial APIs into dashboards.
- Optimized data-heavy endpoints with Django ORM and async processing.
- Drove agile sprints and cross-functional meetings to align business and tech.

Software Developer Intern

CI Financial

June 2023 – August 2023, Toronto, ON

- Designed and launched the first version of an internal web app with Django and JavaScript.
- Built and optimized backend logic for financial data retrieval and processing.
- Collaborated in agile processes: stand-ups, sprint planning, and code reviews.
- Created interactive dashboards enabling advisors to access real-time insights.

PROJECT

ethanurbanky.dev

ethanurbanky.dev

- Built a next-generation personal portfolio with modern design, interactive project showcases, and gesture-based navigation, deployed globally on Vercel Edge.
- Engineered custom animations and particle systems using Framer Motion, GSAP, and HTML5 Canvas API, delivering smooth 60fps performance across devices.
- Designed a dark-first, responsive UI system with Tailwind CSS, optimized for accessibility, mobile iOS Safari quirks, and seamless keyboard navigation.
- Implemented interactive App-Store-style project gallery with live demos, GitHub links, and branded assets for professional presentation.
- Enhanced UX with custom cursor physics, kinetic typography, and contextual feedback, emphasizing storytelling and visual flow.

UPick – Founder and Developer

github.com/ethanurbanky2005/UPickv0.git

- Led end-to-end product development, from wireframes to backend architecture (Python/Flask/FastAPI) and frontend (React.js).
- Built machine learning models with advanced feature engineering, dynamic weighting, and probability calibration to improve prediction accuracy.
- Integrated real-time APIs (OddsAPI, Sportradar, weather data) to enhance predictive insights and user experience.
- Implemented data governance and security measures aligned with GDPR/CCPA, including encryption and compliance frameworks.
- Iterated on features and ML models, incorporating feedback to refine usability and accuracy.

EDUCATION

Bachelor Of Science/ Honors Specialization in Data Science

University of Western Ontario • London, Ontario • 2027

High School Diploma/ International Baccalaureate Graduate

Upper Canada College • Toronto, Ontario • 2023

SKILLS

Core: Python, Java, JavaScript, HTML5, C++, C

Misc: DevOPS (CI/CD, Docker), Agile (Scrum, Sprint Planning)

Data: Pandas, SQL, SQR, NumPy, SQR, PostgreSQL, Snowflake, Scikit
